🔹 About Me

A dedicated Full Stack Developer with hands-on experience building scalable web applications using **Angular** and **Java (Vert.x)**. Skilled in **API development**, **server-side logic**, and **performance optimization**. Proficient in front-end and back-end technologies including **Node.js**, **React**, **Java, Angular, Go**, and **PostgreSQL**.

Experienced in **database management**, **cross-platform development**, and integrating **third-party APIs**. Passionate about building secure, user-focused solutions and following best practices throughout the **software development life cycle (SDLC)**.

🎓Education

Jimma University
Bachelor's Of Science, Computer Science

Jimma Institute of Technology(JIT)
3.32/4.00 | Exit Exam : 71/100

💼 Work Experience

Full Stack Developer **Etech SC, Addis Ababa, Ethiopia (Dec 2023 – Sep 2025)**

Savings and Credit Company Management System (SACCO)

- Developed a comprehensive financial management platform tailored to financial institutions and banks.
- Designed and implemented modules for budgeting, reconciliation, and financial reporting.
- Built robust **server-side logic** for inventory and asset management, later adapted for ERP systems.
- Led client-facing demos and provided onboarding training sessions.

Share Management System

- Automated dividend calculations and reinvestment workflows.
- Built a real-time attendance tracking engine for stakeholders.
- Designed features for member registration, share tracking, and dividend distribution via **RESTful services**.

Key Contributions Across Projects

- Mentored junior developers in Angular, Java, and PostgreSQL.
- Conducted **code reviews** and led collaborative feature sprints.

- Followed **continuous integration** practices and contributed to **microservices architecture** designs.
- Collaborated on an internal common library to improve developer experience and code reusability across projects.

Backend Engineer **Eaglelion system technologies,**
Addis Ababa, Ethiopia (Dec 2023 – Sep 2025)

Dashen Super App

- Contributing to the backend modernization of one of Ethiopia's largest fintech ecosystems.
- Optimizing high-volume transaction workflows to improve response time and throughput.
- Refactoring legacy services, enforcing coding standards, and ensuring best-practice implementation across the codebase.
- Re-implementing unstable third-party integrations to improve reliability, error handling, and performance.
- Collaborating with QA teams to benchmark, measure, and validate backend performance improvements.
- Enhancing database queries and transaction logic to ensure accuracy, scalability, and consistency across services.

🛠️ CORE COMPETENCIES

- Full-Stack Development (Angular, Java, Node.js)
- API Development & Third-Party API Integration
- Server-Side Logic & Performance Optimization
- PostgreSQL, MySQL, Redis
- Microservices & Event-Driven Design
- Secure, Scalable Application Development
- Real-Time Calculations & Error Handling
- Version Control (Git, GitHub)
- CI/CD, Version Control, Unit Testing, Code Review
- Agile Methodologies, Real-Time Logic Handling

💻 TECH STACK

Languages: Java, JavaScript, TypeScript, Go
Frameworks: Angular, Express.js, Vert.x, Spring Boot, Gin
Databases: PostgreSQL, MySQL, Redis
Tools: Git, GitHub, Docker, Kubernetes (basic), Jenkins (basic)
Practices: RESTful Services, CI/CD, Unit Testing, SDLC, Agile Methodologies

🧪 Personal Projects

API Gateway - Go (In Progress)
Tech: Go, Gin, Fasthttp, JWT, Custom Middleware, Unit Testing

- Designed a modular API Gateway with middleware for JWT authentication, rate limiting (token bucket), and structured request logging.
- Built groundwork for reverse proxying and route-based load balancing using `fasthttp`.
- Targeting full modularization and 90%+ test coverage using `testify`.

Library Management System - Go (Feb 2025)
Tech: Go, Gin, GORM, PostgreSql, JWT, Unit Testing

- Developed a RESTful backend for managing users, books, and loans.
- Integrated JWT authentication with role-based access control.
- Wrote unit tests for auth and domain logic using `testify`.
- Used GORM ORM with PostgreSQL for data persistence.

📚 Certifications

- AWS Certified Cloud Practitioner
- AWS Solutions Architect (In progress)
